

# Energy and Climate Partnership of the Americas

Alianza de Energía y Clima de las Américas  
Parceria em Energia e Clima das Américas  
Partenariat des Amériques sur l'énergie et le climat

## Participating Countries

Colombia, Panama, and Trinidad & Tobago

## Objective

To showcase the viability of design and manufacturing techniques that produce no waste or pollution as a business approach to improving productivity, energy efficiency and environmental performance in the industrial sector in general, and SMEs in particular.

## Overview

The project advances pioneering techniques to eliminate waste and pollution in production and consumption processes, thereby emulating nature's biological cycles.

## Activities

- Increase awareness, knowledge and collaboration among stakeholders regarding zero waste production techniques
- Provide technical and policy advice on economic and environmental benefits of sustainable design and circular economy production methods
- Assess the viability of low carbon production in targeted industries of Colombia, Panama and Trinidad and Tobago
- Establish strategic alliances with key national, regional and global partners to promote the circular model approach

## Implementing Partners

Organization of  
American States | More rights  
for more people

Alliances:

Financing:

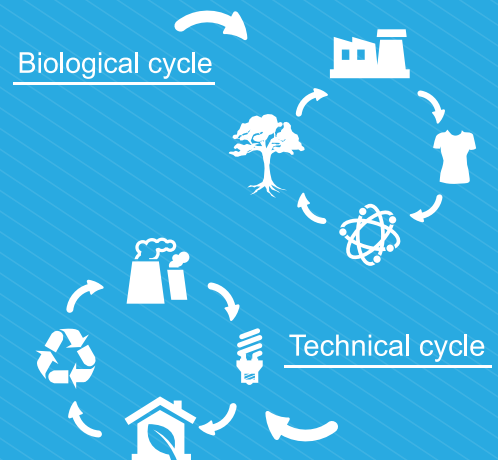

Government of  
the United States

## Closed Loop Cycle Production in the Americas

*Facilitating the transition  
towards a circular economy*
