**Guiding Questions**

1. How can energy policy and investment in renewable generation assets be aligned with roadmaps and national development plans to support the green economic recovery? Can an innovation-friendly approach be adopted? Can it be achieved without fossil fuels? What business models can be used to overcome barriers to universal access to energy?

2. How can we make the shift from fossil fuels to renewables smoother and more environmentally sustainable? How can we make the economic transition just and inclusive? How can we avoid the lock-in of inappropriate energy infrastructures and support the Just Energy Transition (JET)?

3. What collaboration opportunity within the framework of ECPA would you like to see developed to promote just and inclusive energy transitions in the Americas? How can we foster a commitment to achieve the climate goals set by the Paris Agreement?

4. How can circular economy and social accountability be improved in the context of just and inclusive energy transitions? How can we ensure that energy value chains are connected to the circular economy?

5. What new financial mechanisms could link sustainable finance with opportunities to support SDG 7, meet Paris Agreement commitments and reward ambitious energy transition strategies?

6. What policy tools are needed to ensure that energy transitions do not compound the region’s existing inequalities and vulnerabilities? How can we make energy systems, as well as the socioeconomic fabric of the region, more resilient to socio-economic shocks?

7. How can we advance just and inclusive energy transitions in the Americas?
